

AMENDMENTS TO THE ABSTRACT

Please replace the originally filed Abstract with the attached Abstract which is limited to a single paragraph as required by MPEP §608.01(b). The new abstract is shown below and is also found on a separate sheet attached to the end of this paper.

ABSTRACT

A process for distributing audiovisual sequences may involve generating a modified main stream from an audiovisual sequence as well as complementary information that may enable equipment receiving the modified main stream and the complementary information to synthesize the audiovisual sequence. The modified main stream and the complementary information may be separately transmitted to the equipment.
